"The AOD Provider Collaborative is unique and enjoys significant support from both the DHB – Counties Manukau Health – and its own members.

We believe the Collaborative is an integral part of achieving our vision for the future.

We will continue to work in partnership to develop projects that advance both service provision and outcomes for the people that use them. Together, we will build and develop the capacity of our workforce to better meet the needs of Counties Manukau's rich and diverse population."

WORKING TOGETHER TO MAXIMISE POSITIVE OUTCOMES

AOD Provider **Collaborative**

An introduction to the AOD Provider Collaborative

The Counties Manukau AOD Provider Collaborative was formed in 2009 to ensure providers within the Counties Manukau District Health Board catchment area are working together to maximise positive outcomes for AOD (alcohol and other drug) clients.

Funded by Counties Manukau Health with additional support from Odyssey, the Collaborative brings together 16 organisations delivering alcohol and drug treatment or related services within the region.

It seeks to resource activities that are compatible with the Counties Manukau mental health and addictions philosophy in accordance with its strategic plans.

In fulfilling this purpose, the AOD Provider Collaborative has initiated projects that seek to support the Counties Manukau AOD workforce, contribute to the sector's growth, and help make the services great places to work.

What we do

Through its activities, the AOD Provider Collaborative seeks to:

Understand the AOD treatment space better...

We have commissioned research on topical issues such as destigmatisation, vocational support and aftercare; and we have recommended enhancements to service delivery and organisational effectiveness based on this research.

Invest in the continuing professional development of the AOD workforce...

We provide opportunities for practitioners to enhance their practice through learning initiatives and practice tools such as an annual research symposium.

Promote accessibility for the users of our services ...

We have mapped the AOD services available within Counties Manukau and have produced a service map to help AOD service users and their whānau to get the help they need.

Articulate a career path for new and emerging AOD practitioner talent...

By investing in placement, internship and other professional development programmes, we hope to nurture an AOD practitioner talent pipeline for Counties Manukau.

Support consumer and peer services and networks...

We are investing in resources that strengthen the organisation, coordination and promotion of consumer and peer services.
